Topic-'Professional Opportunities in the Education Sector in the Light of National Education Policy 2020'

Date 9th January 2023.

Venue- Room no 311 (Mata Sundri College)

Dr Prakash Iyer and Ms Anjali, faculty members from Azim Premji University, held a workshop for third and fourth-year students. The session started by imparting information on the topic after a brief introduction to 'National Education Policy 2020'. It entailed several job prospects after B.El.Ed. related to education, like designing syllabuses, managing schools, curriculum revision, writing textbooks, policy analysis and implementation, community interaction, subject matter experts, developing curricular material, and in-service education.

They envisioned the multiple realities that a facilitator needs to encounter in a classroom setting. Various courses and scholarships offered by APU were also discussed in detail.

The narratives they cited support their idea of education, its implications in the long run, the impact of various government policies on education, the appropriate usage of textbooks, and the role of a teacher in a classroom. The session culminated with an interactive discussion with the participants about their prospects.
