

Classroom Management Workshop

Classroom Management Workshop was conducted on 21st February, 2020 by Ms. Preminda Langer from Scholastic. The objective of the session was to provide hands-on experience to third year students in various Classroom Management Strategies, especially group work and cooperation among children while working together. This is of extreme importance especially for their field experiences in classrooms as teachers. Another aim was to enable the strategies with some of the theoretical constructs done in their theory classes.
