

Ethical decision making- (Skill Enhancement Course)

The paper, Ethical decision making, is a Skill Enhancement paper taught to the students of B.A. Program. This paper aims to enable students to understand ethical dilemmas in real life situations and taught to resolve such dilemmas through various ethical decision-making models. Students actively engage in discussions about situation which highlight the ethical problems and through the application of ethical principles asked to think about the most apt ethical solution. Students make projects on various topics related to ethical principles, ethical dilemmas and ethical decision-making models. They present their projects in the class mentioning the objective, concern and ethical decision model applied. It helps them to understand the application of such models in their daily life situation. This paper thus enhances ethical decision-making skills of the students.
