

REPORT On
Workshop
“Introduction and Application of Chat GPT in Various Domains”

Organized By
PRAYAS- Placement and Internship Cell

*An initiative of **Mata Sundri College for Women** in
Collaboration with **Data Trained***

In today's world, artificial intelligence (AI) has emerged as a transformative force, revolutionizing various industries and shaping our daily lives in unprecedented ways. With this notion, on 24th June 2023, **The Placement and Internship Cell, Mata Sundri College for Women** hosted an interactive session on **“Introduction and Application of Chat GPT in Various Domains”** in collaboration with **Data Trained**.

Ms. Nadeeha, presently a consulting data scientist in KPMG, Ms Nadeeha has previously worked with InApp and AlmaBetter with a vision for creating a positive impact on people and businesses. She is skilled in Python and its data science toolbox, Machine Learning, Cloud computing Platforms, Team Management and Public Speaking. Ms Nadeeha is a strong community and social services professional with a Bachelors in Technology focused on Electronics and Communication Engineering from Government Engineering College, Barton Hill. She demonstrates excellent leadership qualities, and a deep passion to help businesses develop data-driven solutions.

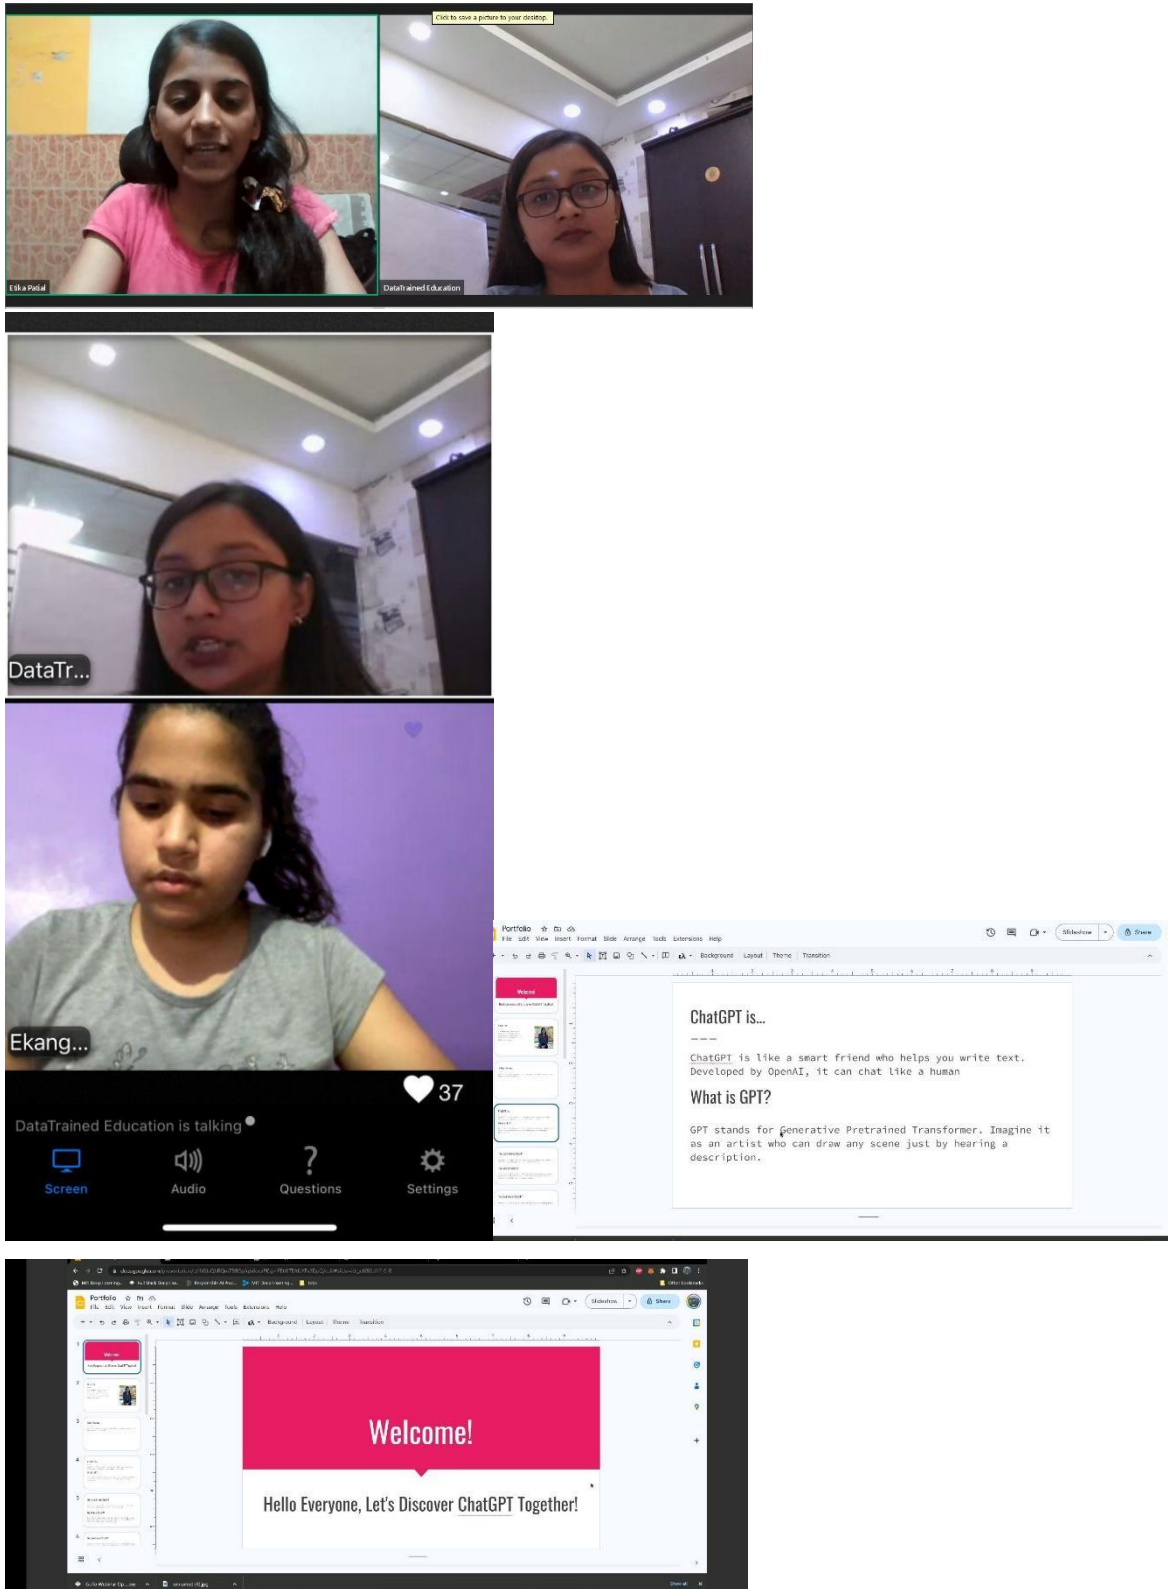

Data Trained is an ed-tech company with the aim of imparting quality programs in emerging technologies like Data Science, Artificial Intelligence etc, data trained aims to make quality professional education accessible to all.

A total of **58 students registered** for the workshop which was held online on **24th June 2023** from **4:00 pm to 5:00 pm**.

The session commenced with an engaging introduction, capturing the participants' attention and setting the stage for an enlightening exploration of Chat GPT and its applications in various domains. During the session, the speaker delved into the intricacies of Chat GPT, offering insights into its inner workings and showcasing its real-world applications. Participants were not only presented with theoretical knowledge but also had the opportunity to witness the practical implementation of Chat GPT in action through a live demonstration. This hands-on experience allowed attendees to witness firsthand how Chat GPT effectively addressed their queries, showcasing its potential as a powerful tool in their respective fields. Through discussions and exchanges of ideas, attendees gained valuable insights into the realm of artificial intelligence and its implications across diverse domains.

Furthermore, the session was a comprehensive source of information, equipping participants with the necessary knowledge to leverage Chat GPT for their career advancement.

The session witnessed an enthusiastic participation and all the queries were answered by the speaker. The vote of thanks was delivered by Ms. Etika .

ChatGPT in Marketing

- ChatGPT can generate catchy marketing copy, creative slogans, and engaging emails.
- Example: A company could use ChatGPT to brainstorm catchy taglines for a new product or create personalized email campaigns.
