

## Department of BA. Programme Trip Report to Biodiversity Park

Date: 12 October,2023

Venue: Yamuna Biodiversity Park

The recent departmental excursion to the Yamuna Biodiversity Park was an enriching experience, fostering both learning and team bonding for the students of 3rd year. Set against the backdrop of lush greenery, the park showcased a plethora of flora and fauna, serving as an educational hub for conservation enthusiasts.

40 students from the final year were chosen for the visit. The visit commenced with our college professors, enlightening us about the diverse ecosystems and the significance of biodiversity in sustaining life on Earth. Observing the varied plant species, from indigenous to exotic, provided valuable insights into environmental sustainability and conservation efforts.

Engaging in group activities, such as tree and wildlife spotting, strengthened teamwork and environmental consciousness among participants. Interactive sessions on conservation strategies further deepened our understanding of preserving natural resources.

Overall, the trip was a stimulating blend of education and enjoyment, leaving an indelible mark on our collective consciousness about the importance of biodiversity preservation.
