7 Objective of the event /Concept Note/ Activities covered in 50-60 words (appropriate details)	**The Imitation Game is a film based on Cryptographer Turing's life. Alan Turing was a manifestly unusual hero. In his professional life, he conceived of the modern computer before the technology to build it even existed. As a patriot, he helped win the Second World War, not by leading troops or firing bullets. The Germans used the Enigma machine (the greatest encryption device in history, used by the Germans for all major communications). With one hundred and fifty nine million million million possible Enigma settings to try). Alan used his knowledge of cryptography to build a machine that broke the Nazi's codes as part of a secret military operation. The movie inspired the students to realise how what the society thought about him did not affect him or his work and how his hard work made the world an infinitely better place precisely because he was extraordinary.**
