**PEER MENTORING REPORT  
BA PROGRAMME

Mentoring is a relationship, a journey between the mentor and the mentee on the road to success at college. The more you give in helping others grow and reach their goals, the more you can receive back from the experience. In helping others, you help yourself along the way too, and gain other positive benefits that enhance your own personal development.

I, myself, arranged a session of peer mentoring 3rd sem students in Political Science under the guidance of Dr.Khushboo Verma. The e poster was shared in advance.

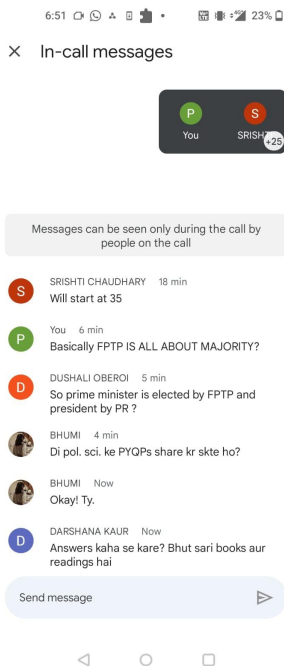

29 students from section A attended the session. It was very interactive as students were more comfortable in asking doubts from someone who has been there and were keen to know more.

They also conveyed their queries which were cleared on the spot.

By the end of the session attendance was also taken.
