

“Teachers are those who help find strengths, wipe away tears, overpower demons and conquer fears”

On September 5 2023, Students of STATISTIKA, the Department Of statistics, celebrated teachers’ day by organising a small surprise for all the lovely teachers of the department. The celebration started at 10:30 AM by welcoming the teachers and thanking them for all the efforts that they put in everyday. After that a small cake cutting ceremony was held and the students presented roses and cards to the teachers as a token of gratitude. Around 11:30 AM, Reet Kaur, a second-year student, gave a vibrant performance, followed by a performance by 3rd years, both of which were loved by all the fellow students as well as the teachers. After the performance, students and the teachers had a fun dancing session.

After the fun and eventful celebration, the teachers were given a vote of thanks and the event ended at a positive and a joyful note.
