1. Disabled Friendly Infrastructure and Environment

Mata Sundri College is deeply committed to promoting the integration of differently-abled individuals, actively working to ensure their inclusion in all aspects of campus life. This dedication is reflected in the various facilities and resources designed to support and empower these students.

The college library, which houses a dedicated Helen Keller Unit, is tailored specifically for visually impaired and differently-abled students, providing an array of resources to facilitate their learning and engagement. The unit is equipped with computers that have screen reading software, allowing students to access digital content independently and effectively. In addition, the library includes a Braille embosser, which enables visually impaired students to produce Braille materials, ensuring they have access to vital information in a format they can read. The library offers a Daisy Player, an advanced e-book reader that provides a user-friendly experience for accessing various types of digital books and audio materials. This technology enriches the educational experience by allowing students to explore a wide range of literature and resources. To further support visually impaired students, there is also a dedicated section for Braille books, ensuring that these students have access to a comprehensive collection of reading materials.

In addition to the resources available in the library, the college has made significant investments in disability-friendly infrastructure across the campus. This includes the installation of lifts for both students and staff and ramps which are strategically placed throughout the campus, providing essential access for those with mobility challenges. The implementation of tactile pathways aids visually impaired students in navigating the campus safely and independently, enhancing their overall experience. The college has also installed chairlifts on staircases, offering an additional means of accessibility for students who may have difficulty using stairs. These facilities reflect the Institution's commitment to fostering an inclusive environment where differently-abled individuals can thrive academically and socially.

2. Vocationalizing Education, Skill Enhancement and Promoting STEM Based Learning

We provide skill-based education to enhance student employability through various vocational courses, skill enhancement programs and STEM Learning. Our objective is to develop a pedagogy that seamlessly integrates conventional curriculum with marketable skills. This approach has proven to be highly attractive to our students.

The Vocational Centre offers training courses for young women, leading them to lucrative job offers. Additionally, it organizes various field exposure activities and workshops to enhance the skills of students. For more information, please refer to <https://vocational.mscw.ac.in>

The Entrepreneurship Cell, 'Uddham', is dedicated to nurturing entrepreneurial aspirations and skills among female students, preparing them to launch their own start-up ventures in the future. Frequent workshops on relevant entrepreneurial skills are held to enable students to explore entrepreneurship as a career and to understand its nuances. Advantage Battle, a major entrepreneurial competition, celebrated Indian startups by offering a platform for innovative pitches and social media engagement. Participants showcased business ideas, competing for recognition and networking with industry leaders. A workshop on trading Crypto Currency highlighted Bitcoin's potential to disrupt banking, enhance global transactions, and support decentralized finance. Uddham also co-hosted Connexus 2024, a two-day summit with Vyapaar, offering panel discussions, networking, and awards to inspire and empower young entrepreneurs. For more details, please visit <https://mscw.ac.in/Uddham.aspx>

The college Internship and Placement Cell, in collaboration with other departments, regularly organizes career counseling and skill-based counseling sessions to enhance the competitiveness of our students in the job market. For more information about the activities of the Internship Cell, please refer to: https://mscw.ac.in/placement_cell.aspx

Departments such as Computer Science and Statistics actively promote STEM learning, aligning our students' skills with the demands of the economy. This approach is in line with our vision of empowering women both academically and professionally. We regularly organize short-term courses for skill enhancement, offering both 2-credit and 3-credit options. Under IQAC, MSCW launched its mobile app on October 25, with the app development team being shortlisted among the top 100 startup ideas at the Udhmodya Foundation's Startup Accelerator Program, while GDSC-MSCW was established to foster collaboration with Google, and Aarogyam cell focused on mental health with workshops on stress management and life skills.
