Female foeticide In India Is the abortion of a female outside of legal methods. The natural sex ratio is assumed to be b/w 103 and 107 and any number above it is considered as suggestive of female foeticide. The Indian government has passed pre-conception and Pre-Natal Diagnostic Techniques Act (PCPNDT) in 1994 to ban and punish pre-pregnancy sex screening and female foeticide. It is currently illegal in India to determine or disclose sex of the foetus to anyone. However, there are concerns that PCPNDT Act has been poorly enforced by authorities.

Once rape has been committed, it confirms that all measures to stall violence have failed. Reaction in the form of declaration of enhanced punishment is largely an expression of helplessness and frustration. The emphasis should be on prevention and rehabilitation. Legislation by itself would not suffice because violence against women is a deep rooted social problem. Women cannot solve the problems by themselves. Women should understand men and men should understand women. Both should work together to eradicate the menace.

Recommendations for combating violence against women

Mental illness → Psychiatric illness should be identified and treated promptly. Patients with active symptoms should be kept in a protected environment till substantial improvement.

takes place

Restriction on use of alcohol → There should be prohibition of alcohol use in mass gathering in institutions, public places like trains and buses. The numbers of alcohol outlets should be decreased so it decreased the crime against women.

Control on media → sexual material should be censored good themes, which condemn violence and georby rehabilitation of the victim, should be projected. Ban on pornography should be strictly implemented. The sites may be blocked

marriage → marriage of boys and girls should preferably be in early 20s as soon as feasible, so that sexual needs could be satisfied in a socially appropriate manner

law enforcement → Efficient and accountable law enforcement machinery at all levels (administration, government, police, Judiciary) is needed.

Laws → Change in mind set of the judiciary → This is the need of the day.

India Justice additional solicitor general of India, aptly stated "It's time for India's courts to gaze inward and turn out deeply embedded patriarchal notions that stop judgments from being fair to women. Sexism within the system has to go before it does more damage in the country."

Amendments in existing legislations → The Hindu Marriage Act (1955) mental illness may be removed from conditions of Hindu marriage

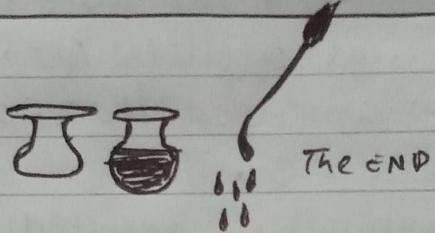

PWDVA, 2005 and DPA, 1961:- Assessment for mental illness may be incorporated in the code civil procedure so that the mental illness is identified in the victim.

Gender sensitization → Gender sensitization by parents and teachers is needed regarding the sensitivities and boundaries of men-women relationships.

Conclusion :- At the end there are several laws and offenses and their punishment under Indian Penal Code to women. The government of India have made efforts in favor of women at workplace Act 2013, protection of children against several offenses Act, 2013 etc recently. It has also amended the IPC and Code of Criminal Procedure. The government is keen to bring laws for Dowry related offenses and for Honor killing. Cyber crimes crimes would be tackled sooner or later. In the recent years due to change in society, women are now, ready to fight for themselves and they are getting a huge support. We wish to change our society but first we have to change our thinking. When we see the ancient thinking of society this is according to the Mahabharat by cherishing the women one virtually worships the goodness of prosperity. We need to take back this thinking again if we don't take useful steps so there is a day in future no single female is left in our earth.
