

Financial Modelling

The Career Development Cell, in collaboration with MSIIC, organised a workshop titled **Career in Financial Modeling** on 20th March 2026. The session witnessed active participation from students of various courses, reflecting their interest in finance and related career opportunities.

The session was conducted by **Hargun Singh Dhody**, a CFA and FRM professional, who shared valuable insights on financial modeling and its practical applications. He emphasized the importance of strong conceptual clarity over rote learning, highlighting that understanding basic concepts is essential for success in any field.

A key highlight of the workshop was a **live case study**, where students actively participated in solving a financial problem under the guidance of the speaker. The session was highly interactive and provided students with a clear understanding of how financial concepts are applied in real-life scenarios. Through this, students learned how to analyse costs, revenues, and assumptions in a structured manner. The speaker also explained the concept of **feasibility analysis**, helping students understand how to evaluate whether a project is financially viable or not.

The event was conducted under the guidance of Prof. Harpreet Kaur, Principal, and was efficiently convened by Dr. Harshmeeta Kaur Soni and Dr. Ashema Hasti, with support from the MSIIC team.

The session concluded with an interactive discussion, leaving students motivated and better informed about financial modeling. Overall, the workshop was highly insightful and practical. It not only strengthened students' conceptual understanding but also gave them hands-on exposure through the case study, helping them understand the importance of feasibility analysis and real-world application of financial concepts.
