

DIGITAL POSTER MAKING- 25th SEPTEMBER, 2021

"One step for a better environment today is one step towards a better future tomorrow".

Parivartan, the NSS unit of Mata Sundri College for Women organized a Digital Poster making Competition on the 'Single-Use Plastic', It was open for all volunteers.

25 Volunteers took part in it and through their creativity in posters they have showed the origin of single use plastic, their alternatives and have created awareness to not use plastic . The event was organized on 25 September 2021.

It was held so that everyone can enhance their Creativity and create awareness among people to reduce, reuse or recycle plastic. It was a perfect way to show people how single - use plastic can be avoided and alternative non - plastic products can be used in day-to-day life.

Since 1950 to 2018, about 6.3 billion tonnes of plastics have been produced worldwide, 9% and 12% of which have been recycled and incinerated, respectively. Human population increase and consistent demand for plastics and plastic products are responsible for continuous increase in the production of plastics, generation of plastic waste and its accompanied environmental pollution.

This needs to stop and appropriate measures need to be taken in this regard, otherwise the health of humans and animals and the environment would be facing severe consequences.
