Corruption is a form of dishonesty or a criminal offense which is undertaken by a person or an organization which is entrusted with a position of authority, in order to acquire illicit benefits or abuse power for one's personal gain. Some methods of corruption include activities like bribery, embezzlement, extortion, nepotism, abuse of discretion and influence peddling.

Corruption in Indian society has prevailed from time immemorial in one form or the other. The basic inception of corruption started with our opportunistic leaders who have already done greater damage to our nation. Corruption in India is a result of the connection between bureaucrats, politicians and criminals.

Posters were made in support of corruption free India. Zero corruption will lead to 100% development of the nation, it will strengthen democracy, promote justice, bring prosperity, improve public health and will support education.

Corruption is a disease and we need to get rid of it for the full functioning of the society. Corruption free India will help India to prosper in the world and improve its position in the world. it will also help in the progress of the society, providing equality to all.

We can limit corruption by making and following some code of conduct, have systemic improvements and reforms to provide transparent citizen-friendly services. We need to have good leadership, credibility, involvement of people, responsible media, education, revision of laws, improving institutions, watch-dog agencies and e-governance in order to have a corruption free life and a corruption free nation.

The volunteers made their poster with pictures and words that depicted the same feelings. They sent us their photos while holding the posters in their hand through the google drive link provided to them.
