Drug abuse is affecting the youth all over the world. It is ruining the society socially, physically, culturally, emotionally and economically. We need to raise our voice to create awareness among people regarding bad effects of drugs. Drugs can not only lead to jail but it also does harm to your health. We only have one body so lets take care of it. Anti-drug campaigns can help to create awareness among people. Keeping this in mind, ppt making was organised to intensify the knowledge of the volunteers. 22 volunteers participated in the event with zeal.
