

PPT MAKING COMPETITION- 21st SEPTEMBER, 2021

Parivartan, the NSS unit of Mata Sundri College for Women organized a PPT competition on "The origin of single-use plastic and the need for its abolition", It was a group competition so all volunteers were divided into 7 groups each consisting of 10 volunteers.

The event was organized on 21 September 2021 at 5 pm on Google meet in the presence of 59 volunteers. This event was conducted not only to highlight the important issue that is Single-Use Plastic but also to build team spirit and coordination. The winner group was group 7 and the runner-up was group 5.

Plastic pollution is a major concern. We tend to discard the wasted and used plastic materials in pits, landfills etc. The soil gets contaminated, in turn; the fertility is affected to a great extent. Furthermore, the plastic dumped acts as the breeding and gathering ground for various disease-carrying insects.

The health of the people around gets affected. Plastic pollution also has its due impacts upon underwater marine wildlife and plantlife. The plastic dumped in the water does not dissolve.

They can be mistaken as food materials by fishes and other aquatic animals; eating up the plastic causes intoxication and prolonged choking. Thus, plastic is harmful for all life forms and must be avoided as much as possible.
