

REPORT ON
“SEMINAR ON INTERNATIONAL EDUCATION & WAY TO STUDY IN AUSTRALIA”

On

28th September 2026

By

PRAYAS – Placement and Internship Cell

An initiative of

Mata Sundri College for Women, University of Delhi

In collaboration with

IDP Education

The transition from undergraduate education to higher studies abroad requires students to have a clear understanding of international education systems, admission processes, course options, language proficiency requirements, and career opportunities. With the objective of creating awareness about overseas higher education opportunities, PRAYAS – Placement and Internship Cell of Mata Sundri College for Women, University of Delhi, in collaboration with IDP Education, organized a seminar on “International Education & Way to Study in Australia” on 28th September 2026.

The seminar was conducted from 12:30 PM to 1:30 PM in Lab 5 and was open to students from all years and courses. The session aimed to provide students with valuable insights into pursuing higher education in Australia and to familiarize them with the opportunities and pathways available to prospective international students.

The session was led by Mr. Bhupender Aujla, Senior Manager at IDP, who is an accomplished education professional with over 16 years of experience. He has held leadership positions at reputed organizations including IDP, Aakash Education, and NIIT, and has conducted more than 1000 training sessions. His areas of expertise include IELTS, communication, public speaking, accent neutralization, and interview preparation.

During the seminar, students were introduced to the scope of international education and the various Master's options available in Australia. The session provided an overview of the opportunities associated with studying abroad and helped students understand the broad pathway involved in planning higher studies in Australia.

The seminar also served as an interactive platform where students could gain clarity regarding international education and explore possibilities for pursuing postgraduate studies overseas. The guidance provided by the speaker helped students develop a better understanding of the factors they need to consider while planning their academic journey abroad.

The collaboration with IDP Education, a global leader in international education services and a co-owner of the IELTS English language test, provided students with an opportunity to learn directly from an experienced professional in the field of international education.

The successful organization of the seminar reflects the collaborative efforts of PRAYAS – Placement and Internship Cell, the college administration, faculty members, IDP Education, and the participating students. The initiative contributed towards enhancing students' awareness of international higher education opportunities and encouraging them to explore suitable academic pathways beyond India.

The seminar concluded successfully, providing students with valuable information and guidance on international education and opportunities to pursue higher studies in Australia. The Placement and Internship Cell expresses its sincere gratitude to IDP Education and Mr. Bhupender Aujla for sharing their expertise and engaging with the students.
