

E-SUMMIT 2026

Uddham – The Entrepreneurship Cell, Mata Sundari College for Women

Date: 11 February 2026

Venue: Mata Sundari College for Women, University of Delhi

E-Summit 2026 was one of the biggest events organised by **Uddham – The Entrepreneurship Cell of Mata Sundari College for Women**. With a footfall of **over 6,000 people**, the campus was full of energy throughout the day. The summit brought together students, entrepreneurs, creators, brands and speakers, giving everyone a chance to experience different sides of entrepreneurship beyond the classroom.

The summit featured three major events, each offering a different experience to the participants. **Bollywood Bazaar**, held in the parking lot area, brought a fun and vibrant Bollywood-inspired atmosphere to the campus. Along with the stalls and activities, the area hosted an engaging game in which **eight teams participated**. After competing against each other, one team emerged as the winner and was awarded goodies as part of the event.

At the **Auditorium**, **Business Heist** saw participation from students across Delhi University. The event received an initial registration of **100 teams**, out of which **25 teams were shortlisted** to participate in the final event. The selected teams competed through the various rounds, bringing in a strong sense of competition and excitement. At the end of the event, **three winning teams were announced**, and the winners received goodies as a token of appreciation for their performance.

Market Underworld, held at **Bebe Nanki Hall**, was another interactive event that focused on strategy, teamwork and decision-making. The event began with **10 participating teams**, out of which **two teams made it to the final round**. After the final challenge, one team emerged as the winner and was awarded goodies.

One of the memorable moments of the day was the **felicitation ceremony for the office bearers**. The team was felicitated by our Principal, **Prof. Harpreet Kaur**, for the efforts put into the society and its events. For the team, it was a special moment because so much work goes on behind the scenes to bring an event of this scale together, and having those efforts recognised made the occasion even more meaningful.

E-Summit also had some great guests from the content creation space. **Kashish Anand** joined us to promote his work and interact with the students. **Yash Sharma** was also a part of the event under the content creator category. Their presence gave students a chance to interact with people working in the digital space and get a closer look at the opportunities that content creation can offer.

The **panel discussion** was another important part of the summit, featuring **Ruchita, Suhani Dahiya, Priyanka Singh and Dr. Sikha**. The panel gave students the opportunity to hear different experiences and perspectives around entrepreneurship, careers, creativity and professional growth. It was a chance for students to take away practical insights and think about the different paths they can explore in the future.

The event was also supported by several **media partners**, including **DU Aada, DU Families, DU India** and many others. Their support helped us reach a larger audience and create more visibility around the summit.

We also had collaborations with various brands, including **Alacrity, Sarbani Perfumes** and several others. Having these brands as a part of E-Summit added to the overall experience and gave students an opportunity to discover and interact with different businesses.

One of the things that made the summit especially meaningful was the participation of **student-led businesses**. Several young entrepreneurs from the student community got the opportunity to showcase their products, interact with potential customers and introduce their businesses to a larger audience. Their participation highlighted the entrepreneurial spirit within the college and gave students a practical platform to experience what it is like to present and promote a business.

With three major events, participation from students across Delhi University, a panel discussion, guest appearances, brand collaborations, media partnerships and numerous student-led businesses, E-Summit 2026 was a day packed with activity. The competitive events, in particular, gave participants a chance to put their ideas, teamwork and decision-making skills into practice, while the winners were recognised with goodies for their efforts.

More than just being an event, E-Summit 2026 gave students a chance to participate, experience entrepreneurship first-hand, meet new people and see what is possible when an idea is actually put into action.

The success of E-Summit 2026 was the result of the collective effort of the **Uddham team, volunteers, participants, collaborators, brands and everyone who contributed behind the scenes**. Seeing thousands of students come together and be a part of something built around entrepreneurship made the hard work worth it and made E-Summit 2026 a truly memorable event for Uddham.
