

REPORT ON
“FROM CAMPUS TO CORPORATE – BUILD A CAREER” WORKSHOP
On
21st August 2026
By
PRAYAS – Placement and Internship Cell

The transition from college life to the corporate world requires students to develop not only academic knowledge but also essential workplace skills, professional confidence, and an understanding of corporate expectations. To help students navigate this transition effectively, PRAYAS – Placement and Internship Cell of Mata Sundri College for Women organized a workshop titled “From Campus to Corporate – Build a Career” on 21st August 2026 in collaboration with Khushjot Foundation.

The session was conducted at 12:30 p.m. in Mata Gujri Hall. The workshop was designed to help students understand the shift from college life to the professional world, develop essential workplace skills, and gain practical insights into building a successful career.

The session focused on preparing students for the professional environment and providing them with a better understanding of the skills and qualities required to successfully transition into the corporate world. The workshop emphasized the importance of professional development, workplace readiness, and adapting to the expectations of the corporate environment.

A significant part of the session revolved around understanding the transition from campus to corporate life. Students were provided with insights into the challenges and opportunities associated with entering the professional world and were encouraged to develop the necessary skills and mindset to build a successful career.

The workshop also aimed to provide students with practical insights into career building and workplace skills. The discussion helped students gain a broader perspective on professional growth and the importance of preparing themselves for the changing demands of the corporate sector.

The session was organized in association with Khushjot Foundation, a non-profit organization working towards creating a more inclusive and supportive society with a focus on education, empowerment, and social development. The foundation's initiative for the workshop focused on supporting young individuals in their transition from campus to the corporate world.

The workshop received a positive response from the participating students and provided them with valuable insights into professional life, workplace expectations, and career development. The session proved to be a meaningful learning experience, helping students gain greater clarity about the transition from college to the corporate environment and equipping them with practical knowledge to build a successful career.

The event concluded successfully, leaving students better informed about the professional world and more aware of the skills and preparation required to make a successful transition from campus to corporate life.
