Students of Mata Sundri College created materials for Mathematics and EVS for primary and middle school students. The materials can be used by the teachers for teaching the concept of addition, subtraction, multiplication etc. In EVS models of water cycle, Food kits, seed kits material kits were handed over. Various games for teaching the concept of multiplication and division were also donated. These will also make the classes print rich and give exposure to students for having hands-on experience. The school principal and staff thanked Mata Sundri college for providing such useful materials.
